DETAILED ACTION

Allowable Subject Matter

Claims 1, 6 to 12, and 15 to 19 are allowed.

The following is an examiner's statement of reasons for allowance: Amended claims 1 and 12 contain allowable subject matter of a bond coat that comprises an overlay coating consisting essentially of intermetallic phases and contains about 30 atomic percent to about 60 atomic percent aluminum, optionally up to about 10 atomic percent chromium, 0.1 atomic percent to about 1.2 atomic percent of at least one element selected from the group consisting of zirconium, hafnium, silicon, and titanium, and the balance being essentially nickel. The Examiner points out that the claimed bond coat is substantially free of ruthenium except for ruthenium that has diffused into the bond coat from the metal alloy substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
